ABOUT THE OFFICE OF TECHNOLOGY ASSESSMENT

The Office of Technology Assessment (OTA) was established by Congress in 1972 to provide congressional committees with analyses of emerging, difficult, and often highly technical issues. Governed by a 12-member bipartisan congressional board—six Senators and six Representatives, and the OTA Director, who is a non-voting member—OTA provides a variety of services to the Senate and the House of Representatives on a broad range of issues. Services include briefings, testimony, and major assessment reports—some requiring more than 2 years to complete. OTA explores complex issues involving science and technology, helping Congress to resolve uncertainties and conflicting claims, identifying alternative policy options, and providing foresight or early alert to new developments that could have important implications for future Federal policy. OTA does not advocate particular policies or actions, but points out their pros and cons, sorts out the facts, and provides opinions.

OTA's multidisciplinary staff plans, directs, and drafts all assessments. It draws extensively on the broad technical and professional resources of the private sector, including the academic community, public interest groups, State and local government, and the citizenry at large.

The publications listed in this catalog are the result of various assessments and analyses requested by the committees of Congress. This catalog is revised periodically as further reports are published by OTA.

General Information

OTA offices are located at: 600 Pennsylvania Avenue, S.E., Washington, DC. Contacts within OTA include:

• Publication Requests	(202) 224-8996
• Personnel Locator	(202) 224-8713
• Congressional and Public Affairs Office	(202) 224-9241
• Office of the Director	(202) 224-3695
• OTA Facsimile Machine	(202) 228-6098

The following OTA administrative reports contain information about OTA and the products produced by the Office. These reports are available from the Publication Requests office.

OTA Brochure Defines OTA's purpose, outlines its organization, and lists some of its completed projects (updated periodically). **PC-104.**

Annual Report to the Congress Describes the activities of the Office during the fiscal year within the context of the legislative agenda of Congress and the events in the United States and the world during the year. The report also includes a review of management and administrative functions. Of particular importance is a thorough report on the various studies produced by OTA and specific indications of their implications for the technological community. Indications of work in progress are provided and remarks from the OTA Board are included to indicate the extent of congressional oversight. **(A-473)**, March 1991; 44 p.

Assessment Activities Lists and briefly summarizes OTA's ongoing projects and publications in press (updated periodically). **PC-105.**

ORDERING INFORMATION

How to Use This Catalog

In the first section of this catalog, publications are arranged in reverse chronological order under subject headings (see Contents). In a later section, titles are listed by OTA's Research Programs in which the subject was assessed. In addition, an alphabetical title index is provided as well as a cross index to subjects.

In each broad subject category, bibliographic information is provided for all titles, including authoring Program, OTA report number, publication date, number of pages, summary availability, and order numbers for both the Government Printing Office and the National Technical Information Service.

How to Order Publications

GPO Ordering Information An order form is provided at the back of this catalog. Unless otherwise noted (*see* sections below), orders should be mailed to:

Superintendent of Documents
Dept. 33
U.S. Government Printing Office
Washington, DC 20402-9325
Telephone (202) 783-3238

Orders must include the title, GPO stock number, quantity, price and total payment enclosed. Allow 4 weeks for delivery (longer for international orders). The Superintendent of Documents pays for normal shipping, and will arrange and bill you for your special shipping needs. United Parcel Service (UPS), first class, and airmail services are available for an additional charge. Call GPO at (202) 783-3238 in advance for rates if you desire this service.

The GPO's Superintendent of Documents will accept orders for government publications via telefacsimile (fax) machine. Orders can be received 24 hours a day, 7 days a week from U.S. and international customers using a VISA, MasterCard, or Superintendent of Documents deposit account number. **To order publications by fax machine, please call (202) 275-0019 or FTS 8-275-0019.**

Most OTA reports are also distributed automatically to over 1400 Regional Depository Libraries throughout the country and may be included in the Government Documents collection of university and public libraries in your area. Please consult your librarian for additional information or contact:

Library Programs Service
Office of the Assistant Public Printer
U.S. Government Printing Office
Washington, DC 20401-9325
Telephone (202) 275-1114

International Orders Orders sent directly to GPO for delivery outside the U.S. will be subject to a 25 percent surcharge for special handling required by international mailing regulations. Such orders will be shipped by surface mail. Airmail delivery is available at additional cost based on the International Postal Zone of the recipient. If you wish to have your order sent by air, you should contact GPO in advance by mail, telephone (1-202-783-3238), telex (710-822-9413 USGPO WSG), or fax (1-202-275-0019) for the total cost of your order. Remittance in U.S. dollars should accompany every order sent directly to GPO. Acceptable remittance includes: checks drawn on U.S. or Canadian banks, UNESCO coupons, International Postal Money Orders, and

charges to prepaid Superintendent of Documents or NTIS deposit accounts and international VISA and MasterCard accounts. Please include your credit card number and date of expiration with your charge order. Checks and money orders should be made payable to the Superintendent of Documents. **NOTE:** GPO cannot accept checks drawn on Canadian banks for less than U.S. $4.00. Orders sent directly to GPO must be in English. GPO will not accept foreign currency, checks on foreign banks, or postage stamps. Allow a minimum of 10 weeks for delivery.

NTIS Ordering Information Documents can be ordered from NTIS in either paper or microfiche format. Orders may be placed using a Deposit Account, VISA, MasterCard, American Express, or government purchase order. Prices can be confirmed and orders can be placed by calling NTIS at (703) 487-4650; for rush orders call (1-800) 553-NTIS.

Commercial Publishers and Other Distributors In addition, many of OTA's reports are reprinted commercially by private publishers. They are described in the listing where applicable and can be ordered direct. *See* listing on p. 21. Additionally, OTA reports are indexed and are available in either microfiche or paper format from the Congressional Information Service.

OTA Ordering Information Office of Technology Assessment, U.S. Congress, Washington, DC 20510-8025, ATTN: Publication Requests; Telephone (202) 224-8996.

Please request only those publications listed as available from OTA. All purchase orders for publications should be sent directly to Superintendent of Documents, GPO at the address listed above. If you encounter difficulty and need assistance in the purchase or receipt of publications listed in this catalog from either GPO or NTIS, please notify the OTA Publications Office at the above address or telephone number.

For information on the operation of OTA or the nature and status of ongoing assessments, write or call:

Congressional and Public Affairs Office
Office of Technology Assessment
U.S. Congress
Washington, DC 20510-8025
Telephone (202) 224-9241

Pre-1980 Publications OTA publications prior to 1980 are available from the National Technical Information Service or the Congressional Information Service, and are indexed in their respective databases. For more information, call the National Technical Information Service at (703) 487-4650 or the Congressional Information Service at (1-800) 638-8380.

GPO stock #052-003-01182-4; $2.50
NTIS order #PB90-219981

Enhancing the quality of U.S. grain for international trade
Food and Renewable Resources Program (F-399), February 1989; 300 p. + (Free summary available)
NTIS order #PB89-187199

Grain quality in international trade: a comparison of major U.S. competitors
Food and Renewable Resources Program (F-402), February 1989; 168 p.
NTIS order #PB89-187249

Pesticide residues in food: technologies and methodologies for detection
Food and Renewable Resources Program (F-398), October 1988; 244 p. *17
GPO stock #052-003-01132-8; $10.00
NTIS order #PB89-136444

Enhancing agriculture in Africa: a role for U.S. development assistance
Food and Renewable Resources Program (F-356), September 1988; 240 p. (Free summary available)
NTIS order #PB89-137087

Using desalination technologies for water treatment
Oceans and Environment Program (BP-O-46), March 1988; 76 p.
NTIS order #PB88-193354

Integrated renewable resource management for U.S. insular areas
Food and Renewable Resources Program (F-325), June 1987; 452 p. (Free summary available)
NTIS order #PB87-205829

Technologies to maintain biological diversity
Food and Renewable Resources Program (F-330), March 1987; 340 p. ***6** +
NTIS order #PB87-207494

Continuing the commitment: agricultural development in the Sahel
Food and Renewable Resources Program (F-308), August 1986; 176 p.
NTIS order #PB87-117644

Assessing biological diversity in the United States: data considerations
Food and Renewable Resources Program (BP-F-39), March 1986; 80 p.
NTIS order #PB86-181989

Technology, public policy, and the changing structure of American agriculture
Food and Renewable Resources Program (F-285), March 1986; 380 p.
NTIS order #PB86-184637

Grassroots conservation of biological diversity in the United States
Food and Renewable Resources Program (BP-F-38), February 1986; 72 p.
NTIS order #PB86-181997

Technologies to benefit agriculture and wildlife
Food and Renewable Resources Program (BP-F-34), May 1985; 148 p.
NTIS order #PB85-239747

Technology, public policy, and the changing structure of American agriculture: a special report for the 1985 farm bill
Food and Renewable Resources Program (F-272), March 1985; 100 p.
NTIS order #PB86-210374

Technologies to sustain tropical forest resources
Food and Renewable Resources Program (F-214), March 1984; 352 p.
NTIS order #PB84-175637

Water-related technologies for sustainable agriculture in U.S. arid/semiarid lands
Food and Renewable Resources Program (F-212), October 1983; 412 p.
NTIS order #PB84-172667

Plants: the potentials for extracting protein, medicines, and other useful chemicals
Food and Renewable Resources Program (BP-F-23), September 1983; 252 p.
NTIS order #PB84-114743

Sustaining tropical forest resources: reforestation of degraded lands
Food and Renewable Resources Program (BP-F-18), May 1983; 56 p.
NTIS order #PB84-104041

Sustaining tropical forest resources: U.S. and international institutions
Food and Renewable Resources Program (BP-F-19), May 1983; 68 p.
NTIS order #PB84-104058

Water-related technologies for sustainable agriculture in arid/semiarid lands: selected foreign experience
Food and Renewable Resources Program BP-F-20), May 1983; 84 p.
NTIS order #PB84-102912

Agricultural postharvest technology and marketing economics research
Food and Renewable Resources Program (TM-F-21), April 1983; 118 p.
NTIS order #PB83-232835

Impacts of technology on U.S. cropland and rangeland productivity
Food and Renewable Resources Program (F-166), August 1982; 266 p. +
NTIS order #PB83-125013

Assessment of the United States food and agricultural research system
Food and Renewable Resources Program (F-155), December 1981; 212 p. +
NTIS order #PB82-170572

DEFENSE TECHNOLOGY

Managing the Nation's defense industrial strength
International Security and Commerce Program:

- American military power: future needs, future choices (BP-ISC-80), October 1991; 28 p.
  GPO stock #052-003-01263-4; $1.75
- Redesigning defense: planning the transition to the future U.S. defense industrial base (ISC-500), July 1991; 128 p.
  GPO stock #052-003-01249-9, $5.50
  NTIS order #PB91-220012
- Adjusting to a new security environment: the defense technology and industrial base challenge (BP-ISC-79), February 1991; 24 p.
  GPO stock #052-003-01225-1; $1.50
  NTIS order #PB91-163261

Verification technologies,
International Security and Commerce Program:

- Cooperative aerial surveillance in international agreements (ISC-480), July 1991; 128 p.
  GPO stock #052-003-01248-1, $5.50
  NTIS order #PB91-220020
- Managing research and development for cooperative arms control monitoring measures (ISC-488), May 1991; 28 p. (Free summary available)
  GPO stock #052-003-01239-1: $1.50
  NTIS order #PB91-197913

Technology against terrorism: the Federal effort
International Security and Commerce Program
(ISC-481), July 1991; 116 p.
GPO stock #052-003-01246-4; $5.00
NTIS order #PB91-219998
Summary: GPO stock #052-003-01226-0; $1.00

Global arms trade: commerce in advanced military technology and weapons
International Security and Commerce Program
(ISC-460), June 1991; 192 p.
(Free summary available)
GPO stock #052-003-01244-8; $9.00
NTIS order #PB91-212175

Arming our allies: cooperation and competition in defense technology
International Security and Commerce Program
(ISC-449), May 1990; 124 p.
GPO stock #052-003-001189-1; $5.00
NTIS order #PB90-254160

Holding the edge: maintaining the defense technology base
International Security and Commerce Program
(ISC-420), April 1989; 200 p.
Free summary available)
GPO stock #052-003-01150-6; $9.00
NTIS order #PB89-196604

Holding the edge: maintaining the defense technology base, Vol 2: appendixes
International Security and Commerce Program
(ISC-432), January 1990; 194 p.
NTIS order #PB90-253345

Containment of underground nuclear explosions
International Security and Commerce Program
(ISC-414), October 1989; 92 p.
NTIS order #PB90-156183

SDI: technology, survivability, and software
International Security and Commerce Program
(ISC-353), May 1988; 292 p. ***2, 25**
(Free summary available)
GPO stock #052-003-01084-4; $12.00
NTIS order #PB88-236245

Seismic verification of nuclear testing treaties
International Security and Commerce Program
(ISC-361), May 1988; 152 p.
NTIS order #PB88-214853

Defense technology base: introduction and overview
International Security and Commerce Program
(ISC-374), March 1988; 124 p.
NTIS order #PB88-192562

New technology for NATO: implementing follow-on forces attack
International Security and Commerce Program
(ISC-309), June 1987; 240 p.
NTIS order #PB87-200267

Technologies for NATO's follow-on forces attack concept
International Security and Commerce Program
(ISC-312), July 1986; 48 p.
NTIS order #PB87-100343

Anti-satellite weapons, countermeasures, and arms control
International Security and Commerce Program
(ISC-281), September 1985; 160 p. ***2, 12**
NTIS order #PB86-182953

Ballistic missile defense technologies
International Security and Commerce Program
(ISC-254), September 1985; 336 p. ***2, 12**
NTIS order #PB86-182961

Arms control in space
International Security and Commerce Program
(BP-ISC-28), May 1984; 68 p.
NTIS order #PB84-198209

Directed energy missile defense in space
International Security and Commerce Program
(BP-ISC-26), April 1984; 100 p. ***2**
NTIS order #PB84-210111

Remote sensing and the private sector: issues for discussion
International Security and Commerce Program
(TM-ISC-20), March 1984; 114 p.
NTIS order #PB84-180777

MX missile basing
International Security and Commerce Program
(ISC-140), September 1981; 335 p.
NTIS order #PB82-108077

Taggants in explosives
International Security and Commerce Program
(ISC-116), April 1980; 263 p.
NTIS order #PB80-192719

Effects of nuclear war
National Security Program
(NS-89), May 1979; 152 p. ***3, 14**
NTIS order #PB296946

Healthy children: investing in the future
Health Program
(H-344), February 1988; 310 p. + (Free summary available)
NTIS order #PB88-178454

Neonatal intensive care for low birthweight infants: costs and effectiveness
Health Program
(HCS-38), December 1987; 88 p.
NTIS order # PB88-158902

Technology dependent children: hospital vs. home care
Health Program
(TM-H-38), May 1987; 116 p. *6
NTIS order #PB87-194551

Children's mental health: problems and services
Health Program
(BP-H-33), December 1986; 192 p. *8
NTIS order # PB87-207486

Indian health care
Health Program
(H-290), April 1986; 384 p.
NTIS order #PB86-206091

Reproductive health hazards in the workplace
Biological Applications Program
(BA-266), December 1985; 436 p. *6 +
NTIS order #PB86-185030

Preventing illness and injury in the workplace
Health Program
(H-256), April 1985; 436 p. *5 +
NTIS order #PB86-115334

Impact of randomized clinical trials on health policy and medical practice
Health Program
(BP-H-22), August 1983; 109 p.
NTIS order #PB84-114560

MEDLARS and health information policy
Health Program
(TM-H-11), September 1982; 150 p.
NTIS order #PB83-168658

Technology and handicapped people
Health Program
(H-179), May 1982; 216 p. +
NTIS order #PB83-172056

- Technology and learning disabilities, (HCS-25), December 1983; 72 p.
  NTIS order #PB84-184043
- Assistive devices for severe speech impairments (HCS-26), December 1983; 64 p.
  NTIS order #PB84-175371
- Selected telecommunications devices for hearing-impaired persons, (BP-H-16), December 1982; 28 p.
  NTIS order #PB83-169292
- Mandatory passive restraint systems in automobiles: issues and evidence, (BP-H-15), September 1982; 50 p.
  NTIS order #PB83-159822

World population and fertility planning technologies: the next 20 years
Human Resources Program
(HR-157), February 1982; 243 p. +
NTIS order #PB82-200338

Assessment of technologies for determining cancer risks from the environment
Health Program
(H-138), June 1981; 242 p.
NTIS order #PB81-235400

Policy implications of the computed tomography (CT) scanner: an update
Health Program
(BP-H-8), January 1981; 112 p.
NTIS order #PB81-163917

Forecasts of physician supply and requirements
Health Program
(H-113), April 1980; 86 p.
NTIS order #PB80-181670

HEALTH INSURANCE

U.S. GOVERNMENT BOOKSTORES

GPO operates U.S. Government Bookstores all around the country where you can browse through shelves and take your books home with you. Naturally, these stores can't stock all of the more than 21,000 titles in GPO's inventory, but they do carry the ones you're most likely to be looking for. And they'll be happy to special order any Government book currently offered for sale and have it directly sent to you. All of GPO's bookstores accept VISA, MasterCard, and Superintendent of Documents deposit account orders. All stores are open Monday through Friday, 7 days a week, with the exception of Kansas City. For more information, please write to your nearest U.S. Government Bookstore.

Describes Unique Source of U.S. Government and Worldwide R&D and Engineering Results

KEEP CURRENT with Technical Information Available Exclusively from NTIS

The National Technical Information Service (NTIS) is the central source for the results of both U.S. and foreign government-sponsored R&D activities. More then 350 Federal agencies report R&D results and activity to NTIS.

NTIS provides:

- Weekly current awareness bulletins that annually summarize tens of thousands of Government studies annually
- Online computer access to both completed and ongoing research
- Thousands of computer programs and data files [tape/diskettes] from U.S. Government agencies

- Technology transfer information -How to find federal laboratory technologies, resources, and licensing opportunities
- More than 80 subscription publications produced by U.S. Government agencies

NTIS also provides direct access to full copies of more than

- 1.5 million technical reports with 60,000 new titles added annually
- 1,700 computer software programs
- 1,300 Government datafiles covering banking, scientific, and social data

NTIS® **Your source for Government research and technology**

TITLE INDEX

Access to space: the future of U.S. space transportation systems, 18
Acid rain and transported air pollutants: implications for public policy, 9
Adolescent health—vol. I: summary and policy options, 10
Adolescent health—vol. II: background and the effectiveness of selected prevention and treatment services, 10
Adolescent health—vol. III: crosscutting issues in the delivery of health and related services, 10
Adolescent health insurance status: analyses of trends in coverage and preliminary estimates of the effects of an employer mandate and Medicaid expansion on the uninsured, 10
Advanced materials by design, 14
Affordable spacecraft design and launch alternatives, 18
Africa tomorrow: issues in technology, agriculture, and U.S. foreign aid, 13
Agricultural commodities as industrial raw materials, 1
Agricultural postharvest technology and marketing economics research, 2
Agricultural research and technology transfer policies for the 1990s, 1
AIDS and health insurance—an OTA survey, 3
Airport and air traffic control system, 20
Airport systems development, 19
Alternative approaches to cargo policy: a supplement to an assessment of maritime trade and technology, 19
Alternative energy futures: the future of liquefied natural gas imports, 17
Alternatives to animal use in research, testing, and education, 4
Anti-satellite weapons, countermeasures, and arms control, 6
Arming our allies: cooperation and competition in defense technology, 6
Arms control in space, 6
Artificial insemination practice in the United States: summary of a 1987 survey, 10
Assessing biological diversity in the United States: data considerations, 2
Assessment of alternatives for a national computerized criminal history system, 18
Assessment of development and production potential of Federal coal leases, 17
Assessment of maritime trade and technology, 19
Assessment of oil shale technologies, 17
Assessment of technologies for determining cancer risks from the environment, 11
Assessment of technology for local development, 17
Assessment of the United States food and agricultural research system, 2
Automated record checks for firearm purchasers, 18
Automation and the workplace: selected labor, education, and training issues, 8
Automation of America's offices, 1985-2000, 4

Ballistic missile defense technologies, 6
Beneath the bottom line: agricultural approaches to reduce agrichemical contamination of groundwater, 9
Big picture: HDTV and high-resolution systems, 5
Biological effects of power frequency electric and magnetic fields, 8
Bioremediation for marine oil spills, 16
Biotechnology in a global economy, 3
Blood policy and technology, 4
Book preservation technologies, 17
Border war on drugs, 19

Catching our breath: next steps for reducing urban ozone, 9
Changing by degrees: steps to reduce greenhouse gases, 9
Children's dental services under the Medicaid program, 10
Children's mental health: problems and services, 11
Civilian space policy and applications, 18
Civilian space stations and the U.S. future in space, 18
Coal exports and port development, 17
Commercial biotechnology: an international analysis, 4
Commercial newsgathering from space, 18
Commercializing high-temperature superconductivity, 14
Compensation for vaccine-related injuries, 14
Competition in coastal seas: an evaluation of foreign maritime activities in the 200-mile EEZ, 16
Complex cleanup: the environmental legacy of nuclear weapons production, 9
Computer-based national information systems: technology and public policy issues, 13
Computer software and intellectual property, 5
Computerized manufacturing automation: employment, education, and the workplace, 4
Confused minds, burdened families: finding help for people with Alzheimer's and other dementias, 1
Conservation and solar energy programs of the Department of Energy: a critique, 9
Containment of underground nuclear explosions, 6
Continuing the commitment: agricultural development in the Sahel, 2
Coping with an oiled sea, 16
Copper: technology and competitiveness, 14
Copyright and home copying: technology challenges the law, 18
Cost effectiveness of influenza vaccination, 14
Costs of AIDS and other HIV infections: review of the estimates, 3
Critical connections: communication for the future, 5

Defending secrets, sharing data: new locks and keys for electronic information, 12
Defense technology base: introduction and overview, 6
Defining rural areas: impact on health care policy and research, 10
Delivering the goods: public works technologies, management, and financing, 19
Demographic trends and the scientific and engineering work force, 8
Directed energy missile defense in space, 6
Do insects transmit AIDS?, 3

Educating scientists and engineers: grade school to grad school, 7
The effectiveness of drug abuse treatment: implications for controlling AIDS/HIV infection, 2
Effects of Federal policies on extracorporeal shock wave lithotripsy, 11
Effects of information technology on financial services systems, 13
Effects of nuclear war, 6
Electric power wheeling and dealing: technological considerations for increasing competition, 8
Electronic bulls and bears: U.S. securities markets and information technology, 12
Electronic delivery of public assistance benefits: technology options and policy issues, 12
Electronic supervisor: new technology, new tensions, 12
Elementary and secondary education for science and engineering, 7
Energy efficiency in the Federal Government: government by good example?, 8
Energy efficiency of buildings in cities, 8
Energy from biological processes, 9
Energy in developing countries, 8
Energy technology choices: shaping our future, 8
Energy technology transfer to China, 13
Energy use and the U.S. economy, 8
Enhancing agriculture in Africa: a role for U.S. development assistance, 1
Enhancing the quality of U.S. grain for international trade, 1
Environmental protection in the Federal coal leasing program, 10
Exploratory workshop on the social impacts of robotics: summary and issues, 4
Exploring the moon and Mars, 18

Facing America's trash: what next for municipal solid waste?, 20
Federal Government information technology:
- Electronic record systems and individual privacy, 12
- Electronic surveillance and civil liberties, 12
- Management, security, and congressional oversight, 12
- Social Security Administration and information technology, 12

Federal policies and the medical devices industry, 14
- Boston elbow, 14
- Contact lens industry—structure, competition, and public policy, 14
- Hemodialysis equipment and disposables industry, 14
- Market for wheelchairs—innovations and Federal policy, 14
- Medical devices and the Veterans Administration, 14
- Nuclear magnetic resonance imaging technology—a clinical, industrial, and policy analysis, 14
- Technologies for managing urinary incontinence, 14

Federally funded research: decisions for a decade, 17
Finding the Rx for managing medical wastes, 20
Forecasts of physician supply and requirements, 11
Forest service planning:
Accommodating uses, producing outputs, and sustaining ecosystems, 1
Setting strategic direction under RPA, 1

Gearing up for safety: motor carrier safety in a competitive environment, 19
Genetic monitoring and screening in the workplace, 3
Genetic witness: forensic uses of DNA tests, 3
Global arms trade: commerce in advanced military technology and weapons, 6
Global models, world futures, and public policy: a critique, 18
Grain quality in international trade: a comparison of major U.S. competitors, 1
Grassroots conservation of biological diversity in the United States, 2
Grassroots development: the African Development Foundation, 13

Health care in rural America, 10
Healthy children: investing in the future, 10
Hearing impairment and elderly people, 1
Helping America compete: the role of Federal scientific and technical information, 12
High performance computing and networking for science, 5
High-temperature superconductivity in perspective, 14
Higher education for science and engineering, 7
Holding the edge: maintaining the defense technology base, 6
Holding the edge: maintaining the defense technology base, vol. 2: appendixes, 6
Hospital information systems at the Veterans Administration, 12
How effective is AIDS education?, 2
How has Federal research on AIDS/HIV disease contributed to other fields?, 2
Human gene therapy, 4

Identifying and controlling immunotoxic substances, 3
Identifying and regulating carcinogens, 3
Impact of advanced air transport technology:
Advanced high-speed aircraft, 20
The air cargo system, 20
Air service to small communities, 20
Financing and program alternatives for advanced high-speed aircraft, 20
Impact of advanced group rapid transit technology, 20
Impact of AIDS on the Kaiser Permanente Medical Care Program (Northern California Region), 2
Impact of randomized clinical trials on health policy and medical practice, 11
Impacts of applied genetics: micro-organisms, plants, and animals, 4
Impacts of neuroscience, 4
Impacts of technology on U.S. cropland and rangeland productivity, 2
Implications of cost-effectiveness analysis of medical technology, 14
Allocating costs and benefits in disease prevention programs—an application to cervical cancer screening, 15
The artificial heart—costs, risks, and benefits, 15
Assessing selected respiratory therapy modalities—trends and relative costs in the Washington, D.C. area, 15
Benefit-and-cost analysis of medical interventions—the case of cimetidine and peptic ulcer disease, 15
Cardiac radionuclide imaging and cost effectiveness, 15
Cost benefit/cost effectiveness of medical technologies—a case study of orthopedic joint implants, 15
Cost effectiveness of automated multichannel chemistry analyzers, 15
The cost effectiveness of bone marrow transplant therapy and its policy implications, 15
The cost effectiveness of upper gastrointestinal endoscopy, 15
The costs and effectiveness of neonatal intensive care, 15
The costs and effectiveness of nurse practitioners, 15
The efficacy and cost effectiveness of psychotherapy, 15
Elective hysterectomy—costs, risks, and benefits, 15
The feasibility of economic evaluation of diagnostic procedure—the case of CT scanning, 15
Formal analysis, policy formulation, and end-stage renal disease, 15
Four common x-ray procedures—problems and prospects for economic evaluation, 15
The management of health care technology in ten countries, 15
Methodological issues and literature review, 15
Periodontal diseases—assessing the effectiveness and costs of the Keyes technique, 15
Screening for colon cancer—a technology assessment, 15
Surgery for breast cancer, 15
Implications of electronic mail and message systems for the U.S. Postal Service, 13
Improving automobile fuel economy: new standards, new approaches, 8
Increased automobile fuel efficiency and synthetic fuels: alternatives for reducing oil imports, 8
Environmental issues for synthetic transportation fuels from coal, 8
Environmental issues of synthetic transportation fuels from coal—background report, 8
Selected technical and economic comparisons of synfuel options, 8
Synthetic fuels for transportation: the future potential of electric and hybrid vehicles, 8
Water availability for synthetic fuels—an assessment of current studies, 8
Indian adolescent mental health, 10
Indian health care, 11
Industrial and commercial cogeneration, 8
Infertility: medical and social choices, 10
Information content of premanufacture notices, 4
Information technology R & D: critical trends and issues, 13
Informational technology and its impact on American education, 13
Informing the Nation: Federal information dissemination in an electronic age, 12
Innovative biological technologies for lesser developed countries, 13
Institutional protocols for decisions about life-sustaining treatments, 1
Integrated renewable resource management for U.S. insular areas, 2
Intellectual property rights in an age of electronics and information, 19
International competition in services: banking, building, software, know-how, 4
Trade in services: exports and foreign revenues, 4
International competitiveness in electronics, 4
International cooperation and competition in civilian space activities, 18
Issues in medical waste management, 20

Launch options for the future: a buyer's guide, 18
Life-sustaining technologies and the elderly, 1
Linking for learning:
a new course for education, 7
Long-lived legacy: managing high-level and transuranic waste at the DOE nuclear weapons complex, 9
Losing a million minds: confronting the tragedy of Alzheimer's disease and other dementias, 1

Managing the Nation's commercial high-level radioactive waste, 20
Managing the Nation's defense industrial strength:
American military power: future needs, future choices, 5
Redesigning defense: planning the transition to the future U.S. defense industrial base, 5
Adjusting to a new security environment: the defense technology and industrial base challenge, 5
Mapping our genes. Genome projects: How big? How fast?, 3
Marine applications for fuel cell technology, 16
Marine minerals: exploring our new ocean frontier, 16
Medical monitoring and screening in the workplace: results of a survey, 3
Medical technology and the cost of the Medicare program, 11
Cost and effectiveness of digital subtraction angiography in the diagnosis of cerebrovascular disease, 12
Diagnosis related groups (DRGs) and the Medicare program: implications for medical technology, 12
Effectiveness and costs of alcoholism treatment, 12
Efficacy, safety, and cost effectiveness of continuous ambulatory peritoneal dialysis, 11
Intensive care units (ICUs)—clinical outcomes, costs, and decisionmaking, 12
Safety, efficacy, and cost effectiveness of therapeutic apheresis, 12

Variations in hospital length of stay—their relationship to health outcomes, 12
Medical technology under proposals to increase competition in health care, 14
Medical testing and health insurance, 11
Medicare's prospective payment system: strategies for evaluating cost, quality, and medical technology, 11
MEDLARS and health information policy, 11
Microelectronics research and development, 5
Moving ahead: 1991 surface transportation legislation, 19
MX missile basing, 6

Neonatal intensive care for low birthweight infants: costs and effectiveness, 11
New developments in biotechnology:
Field-testing engineered organisms: genetic and ecological issues, 3
Ownership of human tissues and cells, 3
Patenting life, 3
Public perceptions of biotechnology, 3
U.S. investment in biotechnology, 3
New developments in neuroscience:
Biological rhythms: implications for the worker, 3
Neural grafting: repairing the brain and spinal cord, 3
Neurotoxicity: identifying and controlling poisons of the nervous system, 3
New electric power technologies: problems and prospects for the 1980s, 8
New structural materials technologies: opportunities for the use of advanced ceramics and composites, 14
New technology for NATO: implementing follow-on forces attack, 6
New ways: tiltrotor aircraft and magnetically levitated vehicles, 19
Nonferrous metals: industry structure, 13
Nuclear power in an age of uncertainty, 8
Nuclear powerplant standardization: light water reactors, 9
Nurse practitioners, physician assistants, and certified nurse-midwives—a policy analysis, 14

Ocean incineration: its role in managing hazardous waste, 20
Ocean margin drilling, 16
Oil and gas technologies for the Arctic and deepwater, 16
Oil production in the Arctic National Wildlife Refuge, 16
Orbital debris: a space environmental problem, 18
Outpatient immunosuppressive drugs under Medicare, 11

Partnerships under pressure: managing commercial low-level radioactive waste, 20
Patent-term extension and the pharmaceutical industry, 5
Patterns and trends in Federal coal lease ownership, 1950-80, 17
Payment for physician services: strategies for Medicare, 11
Performance standards for secondary school vocational education, 7
Pesticide residues in food: technologies and methodologies for detection, 1
Physical vulnerability of electric systems to natural disasters and sabotage, 8
Plague of locusts, 1
Plants: the potentials for extracting protein, medicines, and other useful chemicals, 2
Polar prospects: a minerals treaty for Antarctica, 16
Policy implications of the computed tomography (CT) scanner: an update, 11
Postmarketing surveillance of prescription drugs, 4
Potential effects of section 3 of the Federal Coal Leasing Amendments Act of 1976, 16
Power on! New tools for teaching and learning, 7
Preventing illness and injury in the workplace, 11
Preventive health services for Medicare beneficiaries: policy and research issues, 1
Costs and effectiveness of cervical cancer screening, 1
Costs and effectiveness of cholesterol screening in the elderly, 1
Costs and effectiveness of colorectal cancer screening in the elderly, 1
Screening for open-angle glaucoma in the elderly, 1
Use of preventive services by the elderly, 1
Proceedings of the OTA seminar on the Discrete Address Beacon System (DABS), 20
Protecting the Nation's groundwater from contamination—vol. I, 9
Protecting the Nation's groundwater from contamination—vol. II, 9

Quality and relevance of research and related activities at the Gorgas Memorial Laboratory, 17
Quality of medical care: information for consumers, 10

R & D in the maritime industry: a supplement to an assessment of maritime trade and technology, 19
Radiofrequency use and management: impacts from the World Administrative Radio Conference of 1979, 5
Rebuilding the foundations: State and local public works financing and management, 19
Recent developments in ocean thermal energy, 16
Recombinant erythropoietin; payment options for Medicare, 11
Reducing launch operations costs: new technologies and practices, 18
Reduction of industrial hazardous waste:
Habitability of the Love Canal area: an analysis of the technical basis for the decision on the habitability of the emergency declaration area, 9
Nonnuclear industrial hazardous waste: classifying for hazard management, 9
From pollution to prevention: a progress report on waste reduction, 9
Serious reduction of hazardous waste: for pollution prevention and industrial efficiency, 9
Technologies and management strategies for hazardous waste control, 9
Regulatory environment for science, 17
Remote sensing and the private sector: issues for discussion, 6
Replacing gasoline: alternative fuels for light-duty vehicles, 8
Reproductive health hazards in the workplace, 11
Research funding as an investment: can we measure the returns, 17
Review of the FAA 1982 National Airspace System Plan, 19
Review of the Public Health Service's response to AIDS, 2
Role of genetic testing in the prevention of occupational diseases, 4
Round trip to orbit: human spaceflight alternatives, 18
Royalty management program's auditing and financial system: technical issues, 16
Rural America at the crossroads: networking for the future, 5
Rural emergency medical services, 10

Safe skies for tomorrow: aviation safety in a competitive environment, 19
Safer skies with TCAS (Traffic Alert and Collision Avoidance System), 19
SALYUT: Soviet steps toward permanent human presence in space, 18
Science, technology, and the Constitution in the information age:
Biology, medicine, and the Bill of Rights, 17
Criminal justice, new technologies, and the Constitution, 17
Science, technology, and the Constitution, 17
Science, technology, and the First Amendment, 17
Scientific validity of polygraph testing: a research review and evaluation, 19
SDI: technology, survivability, and software, 6
Seeking solutions: high-performance computing for science, 5
Seismic verification of nuclear testing treaties, 6
Selected electronic funds transfer issues: privacy, security, and equity, 13
Solar power satellites, 9
Space science research in the United States, 18
Space stations and the law: selected legal issues, 18
Starpower: the U.S. and the international quest for fusion energy, 8
Statistical needs for a changing U.S. economy, 7
Status of biomedical research and related technology for tropical diseases, 14
Strategic materials: technologies to reduce U.S. import vulnerability, 14
Strategies for medical technology assessment, 14
Supercomputers: government plans and policies, 5
Superfund implementation:
Are we cleaning up: 10 Superfund case studies, 20
Assessing contractor use in Superfund, 20
Coming clean: Superfund problems can be solved..., 20
Superfund strategy, 20
Sustaining tropical forest resources: reforestation of degraded lands, 2
Sustaining tropical forest resources: U.S. and international institutions, 2

Taggants in explosives, 6
Technical and environmental analyses, energy from biological processes, 9
Technologies for detecting heritable mutations in human beings, 3
Technologies for NATO's follow-on forces attack concept, 6
Technologies for prehistoric and historic preservation, 9
Technologies for reducing dioxin in the manufacture of bleached wood pulp, 9
Technologies for the preservation of prehistoric and historic landscapes, 9
Technologies for underwater archaeology and maritime preservation, 16
Technologies to benefit agriculture and wildlife, 2
Technologies to maintain biological diversity, 2
Technologies to sustain tropical forest resources, 2
Technology, innovation, and regional economic development, 7
Technology, innovation, and regional economic development: census of State government initiatives for high-technology industrial development, 7
Technology, innovation, and regional economic development: encouraging high-technology development, 7
Technology, innovation, and U.S. trade:
Competing economies: America, Europe, and the Pacific Rim, 4
Making things better: competing in manufacturing, 4
Paying the bill: manufacturing and America's trade deficit, 4
Trade adjustment assistance: new ideas for an old program, 4
Technology, public policy, and the changing structure of American agriculture, 2
Technology, public policy, and the changing structure of American agriculture: a special report for the 1985 Farm Bill, 2
Technology, renewable resources, and American crafts, 4
Technology against terrorism: the Federal effort, 6
Technology and aging in America, 1
Technology and East-West trade, 13
Technology and East-West trade: an update, 13
Technology and handicapped people, 11
Assistive devices for severe speech impairments, 11
Mandatory passive restraint systems in automobiles: issues and evidence, 11
Selected telecommunications devices for hearing-impaired persons, 11
Technology and learning disabilities, 11
Technology and oceanography: an assessment of Federal technologies for oceanographic research and monitoring, 16
Technology and Soviet energy availability, 13
Technology and steel industry competitiveness, 5
Technology and structural unemployment: reemploying displaced adults, 7
Displaced homemakers: programs and policy, 8
Plant closing: advance notice and rapid response, 8
Technology and the American economic transition: choices for the future, 7
Review of U.S. competitiveness in agricultural trade, 7
Technology, trade, and the U.S. residential construction industry, 7
Technology and the future of the U.S. construction industry, 7
U.S. textile and apparel industry: a revolution in progress, 7
Technology dependent children: hospital vs. home care, 11
Technology transfer at the National Institutes of Health, 14
Technology transfer to China, 13
Technology transfer to the Middle East, 13
Technology transfer to the United States: the MIT-Japan Science and Technology Program, 13
Trading around the clock: global securities markets and information technology, 12
Transportation of hazardous materials, 20
Transportation of hazardous materials: State and local activities, 20
Unconventional cancer treatments, 10
UNISPACE '82: a context for international cooperation and competition, 18
Update of Federal activities regarding the use of pneumococcal vaccine, 14
Urban ozone and the Clean Air Act: problems and proposals for change, 9
U.S. dairy industry at a crossroad: biotechnology and policy choices, 3
U.S. industrial competitiveness: a comparison of steel, electronics, and automobiles, 5
U.S. natural gas availability: conventional gas supply through the year 2000, 16
U.S. natural gas availability: gas supply through the year 2000, 16
U.S. oil production: the effect of low oil prices, 16
U.S. oil import vulnerability: the technical replacement capability, 16
U.S. passenger rail technologies, 19
U.S.-Soviet cooperation in space, 18
U.S. universities and development assistance, 13
U.S. vulnerability to an oil import curtailment, 16
The use of integrity tests for pre-employment screening, 7
Use of models for water resources management, planning, and policy, 10
Using desalination technologies for water treatment, 1

Verification technologies:
Cooperative aerial surveillance in international agreements, 6
Managing research and development for cooperative arms control monitoring measures, 6

Wastes in marine environments, 16
Water-related technologies for sustainable agriculture in arid/semiarid lands: selected foreign experience, 2
Water-related technologies for sustainable agriculture in U.S. arid/semiarid lands, 2
Western surface mine permitting and reclamation, 16
Wetlands: their use and regulation, 10
Wood use: U.S. competitiveness and technology—vol. I, 4
Wood use: U.S. competitiveness and technology—vol. II, 4
Worker training: competing in the new international economy, 7
World petroleum availability 1980-2000, 17
World population and fertility planning technologies: the next 20 years, 11

Did you know

. . . that close to where you live, free access to Government information is available on subjects ranging from starting your own business to planning a family vacation? Access to this information . . . and much more . . . is free at your Depository Library. So be better informed. Ask at your local library or write to the Federal Depository Library Program, Office of the Public Printer, Washington, DC 20401.

Federal Depository Library Program

GUIDE TO TITLES BY OTA RESEARCH PROGRAMS

BIOLOGICAL APPLICATIONS PROGRAM (BA)
Formerly *Human Resources Program (HR)*

Alternatives to animal use in research, testing, and education, 4
Artificial insemination practice in the United States: summary of a 1987 survey, 10
Biotechnology in a global economy, 3
Commercial biotechnology: an international analysis, 4
Confused minds, burdened families: finding help for people with Alzheimer's and other dementias, 1
Genetic monitoring and screening in the workplace, 3
Genetic witness: forensic uses of DNA tests, 3
Hearing impairment and elderly people, 1
Human gene therapy, 4
Identifying and controlling immunotoxic substances, 3
Impacts of applied genetics: micro-organisms, plants, and animals, 4
Impacts of neuroscience, 4
Infertility: medical and social choices, 10
Institutional protocols for decisions about life-sustaining treatments, 1
Life-sustaining technologies and the elderly, 1
Losing a million minds: confronting the tragedy of Alzheimer's disease and other dementias, 1
Mapping our genes. Genome projects: How big? How fast?, 3
Medical monitoring and screening in the workplace: results of a survey, 3
New developments in biotechnology:
- Field-testing engineered organisms: genetic and ecological issues, 3
- Ownership of human tissues and cells, 3
- Patenting life, 3
- Public perceptions of biotechnology, 3
- U.S. investment in biotechnology, 3

New developments in neuroscience:
- Biological rhythms: implications for the worker, 3
- Neural grafting: repairing the brain and spinal cord, 3
- Neurotoxicity: identifying and controlling poisons of the nervous system, 3

Reproductive health hazards in the workplace, 11
Role of genetic testing in the prevention of occupational diseases, 4
Technology and aging in America, 1
World population and fertility planning technologies: the next 20 years, 11

ENERGY AND MATERIALS PROGRAM (E&M)
Formerly *Energy Program (E)*

Advanced materials by design, 14
Alternative energy futures: the future of liquefied natural gas imports, 17
Biological effects of power frequency electric and magnetic fields, 8
Conservation and solar energy programs of the Department of Energy: a critique, 9
Copper: technology and competitiveness, 14
Electric power wheeling and dealing: technological considerations for increasing competition, 8
Energy efficiency in the Federal Government: government by good example?, 8
Energy efficiency of buildings in cities, 8
Energy from biological processes, 9
Energy in developing countries, 8
Energy technology choices: shaping our future, 8
Energy use and the U.S. economy, 8
Environmental protection in the Federal coal leasing program, 10
High-temperature superconductivity in perspective, 14
Improving automobile fuel economy: new standards, new approaches, 8
Increased automobile fuel efficiency and synthetic fuels: alternatives for reducing oil imports, 8
- Environmental issues for synthetic transportation fuels from coal, 8
- Environmental issues of synthetic transportation fuels from coal—background report, 8
- Selected technical and economic comparisons of synfuel options, 8
- Synthetic fuels for transportation: the future potential of electric and hybrid vehicles, 8
- Water availability for synthetic fuels—an assessment of current studies, 8

Industrial and commercial cogeneration, 8
New electric power technologies: problems and prospects for the 1980s, 8
New structural materials technologies: opportunities for the use of advanced ceramics and composites, 14
Nonferrous metals: industry structure, 13
Nuclear power in an age of uncertainty, 8
Nuclear powerplant standardization: light water reactors, 9
Oil production in the Arctic National Wildlife Refuge, 16
Physical vulnerability of electric systems to natural disasters and sabotage, 8
Potential effects of section 3 of the Federal Coal Leasing Amendments Act of 1976, 16
Replacing gasoline: alternative fuels for light-duty vehicles, 8
Royalty management program's auditing and financial system: technical issues, 16
Solar power satellites, 9
Starpower: the U.S. and the international quest for fusion energy, 8
Statistical needs for a changing U.S. economy, 7
Technical and environmental analyses, energy from biological processes, 9
Technologies for prehistoric and historic preservation, 9
Technologies for the preservation of prehistoric and historic landscapes, 9
Technologies for underwater archaeology and maritime preservation, 16
U.S. natural gas availability: conventional gas supply through the year 2000, 16
U.S. natural gas availability: gas supply through the year 2000, 16
U.S. oil production: the effect of low oil prices, 16
U.S. oil import vulnerability: the technical replacement capability, 16
U.S. vulnerability to an oil import curtailment, 16
Western surface mine permitting and reclamation, 16
World petroleum availability 1980-2000, 17

FOOD AND RENEWABLE RESOURCES PROGRAM (F)

Africa tomorrow: issues in technology, agriculture, and U.S. foreign aid, 13
Agricultural commodities as industrial raw materials, 1
Agricultural postharvest technology and marketing economics research, 2
Agricultural research and technology transfer policies for the 1990s, 1
Assessing biological diversity in the United States: data considerations, 2
Assessment of the United States food and agricultural research system, 2
Beneath the bottom line: agricultural approaches to reduce agrichemical contamination of groundwater, 9
Continuing the commitment: agricultural development in the Sahel, 2
Enhancing agriculture in Africa: a role for U.S. development assistance, 1
Enhancing the quality of U.S. grain for international trade, 1
Forest service planning:
- Accommodating uses, producing outputs, and sustaining ecosystems, 1
- Setting strategic direction under RPA, 1

Grain quality in international trade: a comparison of major U.S. competitors, 1
Grassroots conservation of biological diversity in the United States, 2
Grassroots development: the African Development Foundation, 13
Impacts of technology on U.S. cropland and rangeland productivity, 2
Innovative biological technologies for lesser developed countries, 13
Integrated renewable resource management for U.S. insular areas, 2
Pesticide residues in food: technologies and methodologies for detection, 1
Plague of locusts, 1
Plants: the potentials for extracting protein, medicines, and other useful chemicals, 2
Sustaining tropical forest resources: reforestation of degraded lands, 2
Sustaining tropical forest resources: U.S. and international institutions, 2
Technologies to benefit agriculture and wildlife, 2
Technologies to maintain biological diversity, 2
Technologies to sustain tropical forest resources, 2
Technology, public policy, and the changing structure of American agriculture, 2
Technology, public policy, and the changing structure of American agriculture: a special report for the 1985 Farm Bill, 2
Technology, renewable resources, and American crafts, 4
U.S. dairy industry at a crossroad: biotechnology and policy choices, 3
U.S. universities and development assistance, 13
Water-related technologies for sustainable agriculture in arid/semiarid lands: selected foreign experience, 2
Water-related technologies for sustainable agriculture in U.S. arid/semiarid lands, 2

HEALTH PROGRAM (H)

Adolescent health
- vol. I: summary and policy options, 10
- vol. II: background and the effectiveness of selected prevention and treatment services, 10
- vol. III: crosscutting issues in the delivery of health and related services, 10

Adolescent health insurance status: analyses of trends in coverage and preliminary estimates of the effects of an employer mandate and Medicaid expansion on the uninsured, 10
AIDS and health insurance—an OTA survey, 3
Assessment of technologies for determining cancer risks from the environment, 11
Blood policy and technology, 4
Children's dental services under the Medicaid program, 10
Children's mental health: problems and services, 11
Compensation for vaccine-related injuries, 14
Cost effectiveness of influenza vaccination, 14
Costs of AIDS and other HIV infections: review of the estimates, 3
Defining rural areas: impact on health care policy and research, 10
Do insects transmit AIDS?, 3
The effectiveness of drug abuse treatment: implications for controlling AIDS/HIV infection, 2
Effects of Federal policies on extracorporeal shock wave lithotripsy, 11
Federal policies and the medical devices industry, 14
- Boston elbow, 14
- Contact lens industry—structure, competition, and public policy, 14
- Hemodialysis equipment and disposables industry, 14
- Market for wheelchairs—innovations and Federal policy, 14
- Medical devices and the Veterans Administration, 14
- Nuclear magnetic resonance imaging technology—a clinical, industrial, and policy analysis, 14
- Technologies for managing urinary incontinence, 14

Forecasts of physician supply and requirements, 11
Health care in rural America, 10
Healthy children: investing in the future, 10
How effective is AIDS education?, 2
How has Federal research on AIDS/HIV disease contributed to other fields?, 2
Identifying and regulating carcinogens, 3
Impact of AIDS on the Kaiser Permanente Medical Care Program (Northern California Region), 2
Impact of randomized clinical trials on health policy and medical practice, 11
Implications of cost-effectiveness analysis of medical technology, 14
- Allocating costs and benefits in disease prevention programs—an application to cervical cancer screening, 15
- The artificial heart—costs, risks, and benefits, 15
- Assessing selected respiratory therapy modalities—trends and relative costs in the Washington, D.C. area, 15
- Benefit-and-cost analysis of medical interventions —the case of cimetidine and peptic ulcer disease, 15
- Cardiac radionuclide imaging and cost effectiveness, 15
- Cost benefit/cost effectiveness of medical technologies—a case study of orthopedic joint implants, 15
- Cost effectiveness of automated multichannel chemistry analyzers, 15
- The cost effectiveness of bone marrow transplant therapy and its policy implications, 15
- The cost effectiveness of upper gastrointestinal endoscopy, 15
- The costs and effectiveness of neonatal intensive care, 15
- The costs and effectiveness of nurse practitioners, 15
- The efficacy and cost effectiveness of psychotherapy, 15
- Elective hysterectomy—costs, risks, and benefits, 15
- The feasibility of economic evaluation of diagnostic procedure—the case of CT scanning, 15
- Formal analysis, policy formulation, and end-stage renal disease, 15
- Four common x-ray procedures—problems and prospects for economic evaluation, 15
- The management of health care technology in ten countries, 15
- Methodological issues and literature review, 15
- Periodontal diseases—assessing the effectiveness and costs of the Keyes technique, 15
- Screening for colon cancer—a technology assessment, 15
- Surgery for breast cancer, 15

Indian adolescent mental health, 10
Indian health care, 11
Information content of premanufacture notices, 4
Medical technology and the cost of the Medicare program, 11
- Cost and effectiveness of digital subtraction angiography in the diagnosis of cerebrovascular disease, 12
- Diagnosis related groups (DRGs) and the Medicare program: implications for medical technology, 12
- Effectiveness and costs of alcoholism treatment, 12
- Efficacy, safety, and cost effectiveness of continuous ambulatory peritoneal dialysis, 11
- Intensive care units (ICUs)—clinical outcomes, costs, and decisionmaking, 12
- Safety, efficacy, and cost effectiveness of therapeutic apheresis, 12
- Variations in hospital length of stay—their relationship to health outcomes, 12

Medical technology under proposals to increase competition in health care, 14
Medical testing and health insurance, 11
Medicare's prospective payment system: strategies for evaluating cost, quality, and medical technology, 11
MEDLARS and health information policy, 11
Neonatal intensive care for low birthweight infants: costs and effectiveness, 11
Nurse practitioners, physician assistants, and certified nurse-midwives—a policy analysis, 14
Outpatient immunosuppressive drugs under Medicare, 11
Payment for physician services: strategies for Medicare, 11
Policy implications of the computed tomography (CT) scanner: an update, 11
Postmarketing surveillance of prescription drugs, 4
Preventing illness and injury in the workplace, 11
Preventive health services for Medicare beneficiaries: policy and research issues, 1
- Costs and effectiveness of cervical cancer screening, 1
- Costs and effectiveness of cholesterol screening in the elderly, 1
- Costs and effectiveness of colorectal cancer screening in the elderly, 1
- Screening for open-angle glaucoma in the elderly, 1
- Use of preventive services by the elderly, 1

Quality and relevance of research and related activities at the Gorgas Memorial Laboratory, 17
Quality of medical care: information for consumers, 10
Recombinant erythropoietin; payment options for Medicare, 11
Review of the Public Health Service's response to AIDS, 2
Rural emergency medical services, 10
Scientific validity of polygraph testing: a research review and evaluation, 19
Status of biomedical research and related technology for tropical diseases, 14
Strategies for medical technology assessment, 14
Technologies for detecting heritable mutations in human beings, 3
Technology and handicapped people, 11
- Assistive devices for severe speech impairments, 11
- Mandatory passive restraint systems in automobiles: issues and evidence, 11
- Selected telecommunications devices for hearing-impaired persons, 11
- Technology and learning disabilities, 11

Technology dependent children: hospital vs. home care, 11
Technology transfer at the National Institutes of Health, 14
Unconventional cancer treatments, 10
Update of Federal activities regarding the use of pneumococcal vaccine, 14

INDUSTRY, TECHNOLOGY, AND EMPLOYMENT PROGRAM (ITE)

Formerly *Materials Program (M)*

Assessment of development and production potential of Federal coal leases, 17
Assessment of oil shale technologies, 17
Commercializing high-temperature superconductivity, 14
International competition in services: banking, building, software, know-how, 4

Trade in services: exports and foreign revenues, 4
Patterns and trends in Federal coal lease ownership, 1950-80, 17
Reduction of industrial hazardous waste:
Habitability of the Love Canal area: an analysis of the technical basis for the decision on the habitability of the emergency declaration area, 9
Nonnuclear industrial hazardous waste: classifying for hazard management, 9
From pollution to prevention: a progress report on waste reduction, 9
Serious reduction of hazardous waste: for pollution prevention and industrial efficiency, 9
Technologies and management strategies for hazardous waste control, 9
Strategic materials: technologies to reduce U.S. import vulnerability, 14
Superfund Implementation:
Are we cleaning up: 10 Superfund case studies, 20
Assessing contractor use in Superfund, 20
Coming clean: Superfund problems can be solved..., 20
Superfund strategy, 20
Technology, innovation, and U.S. trade:
Competing economies: America, Europe, and the Pacific Rim, 4
Making things better: competing in manufacturing, 4
Paying the bill: manufacturing and America's trade deficit, 4
Trade adjustment assistance: new ideas for an old program, 4
Technology and steel industry competitiveness, 5
Technology and structural unemployment: reemploying displaced adults, 7
Displaced homemakers: programs and policy, 8
Plant closing: advance notice and rapid response, 8
Technology transfer to the United States: the MIT-Japan Science and Technology Program, 13
Wood use: U.S. competitiveness and technology—vol. I, 4
Wood use: U.S. competitiveness and technology—vol. II, 4
Worker training: competing in the new international economy, 7

INTERNATIONAL SECURITY AND COMMERCE PROGRAM (ISC)
Formerly *National Security Program (NS)*
Access to space: the future of U.S. space transportation systems, 18
Affordable spacecraft design and launch alternatives, 18
Anti-satellite weapons, countermeasures, and arms control, 6
Arming our allies: cooperation and competition in defense technology, 6
Arms control in space, 6
Ballistic missile defense technologies, 6
Commercial newsgathering from space, 18
Containment of underground nuclear explosions, 6
Defense technology base: introduction and overview, 6
Directed energy missile defense in space, 6
Effects of nuclear war, 6
Energy technology transfer to China, 13
Exploring the moon and Mars, 18
Global arms trade: commerce in advanced military technology and weapons, 6
Holding the edge: maintaining the defense technology base, 6
Holding the edge: maintaining the defense technology base, vol. 2: appendixes, 6
International competitiveness in electronics, 4
International cooperation and competition in civilian space activities, 18
Launch options for the future: a buyer's guide, 18
Managing the Nation's defense industrial strength:
American military power: future needs, future choices, 5
Redesigning defense: planning the transition to the future U.S. defense industrial base, 5
Adjusting to a new security environment: the defense technology and industrial base challenge, 5
MX missile basing, 6
New technology for NATO: implementing follow-on forces attack, 6
Orbital debris: a space environmental problem, 18
Reducing launch operations costs: new technologies and practices, 18
Remote sensing and the private sector: issues for discussion, 6
Round trip to orbit: human spaceflight alternatives, 18
SDI: technology, survivability, and software, 6
Seismic verification of nuclear testing treaties, 6
Space stations and the law: selected legal issues, 18
Taggants in explosives, 6
Technologies for NATO's follow-on forces attack concept, 6
Technology against terrorism: the Federal effort, 6
Technology and East-West trade, 13
Technology and East-West trade: an update, 13
Technology and Soviet energy availability, 13
Technology transfer to China, 13
Technology transfer to the Middle East, 13
UNISPACE '82: a context for international cooperation and competition, 18
U.S. industrial competitiveness: a comparison of steel, electronics, and automobiles, 5
Verification technologies:
Cooperative aerial surveillance in international agreements, 6
Managing research and development for cooperative arms control monitoring measures, 6

OCEANS AND ENVIRONMENT PROGRAM (O)
Formerly *Oceans Program (O)*
Acid rain and transported air pollutants: implications for public policy, 9
Alternative approaches to cargo policy: a supplement to an assessment of maritime trade and technology, 19
Assessment of maritime trade and technology, 19
Bioremediation for marine oil spills, 16
Book preservation technologies, 17
Border war on drugs, 19
Catching our breath: next steps for reducing urban ozone, 9
Changing by degrees: steps to reduce greenhouse gases, 9
Coal exports and port development, 17
Competition in coastal seas: an evaluation of foreign maritime activities in the 200-mile EEZ, 16
Complex cleanup: the environmental legacy of nuclear weapons production, 9
Coping with an oiled sea, 16
Facing America's trash: what next for municipal solid waste?, 20
Finding the Rx for managing medical wastes, 20
Issues in medical waste management, 20
Long-lived legacy: managing high-level and transuranic waste at the DOE nuclear weapons complex, 9
Managing the Nation's commercial high-level radioactive waste, 20
Marine applications for fuel cell technology, 16
Marine minerals: exploring our new ocean frontier, 16
Ocean incineration: its role in managing hazardous waste, 20
Ocean margin drilling, 16
Oil and gas technologies for the Arctic and deepwater, 16
Partnerships under pressure: managing commercial low-level radioactive waste, 20
Polar prospects: a minerals treaty for Antarctica, 16
Protecting the Nation's groundwater from contamination—vol. I, 9
Protecting the Nation's groundwater from contamination—vol. II, 9
R & D in the maritime industry: a supplement to an assessment of maritime trade and technology, 19
Recent developments in ocean thermal energy, 16
Technologies for reducing dioxin in the manufacture of bleached wood pulp, 9
Technology and oceanography: an assessment of Federal technologies for oceanographic research and monitoring, 16
Urban ozone and the Clean Air Act: problems and proposals for change, 9
Use of models for water resources management, planning, and policy, 10
Using desalination technologies for water treatment, 1
Wastes in marine environments, 16
Wetlands: their use and regulation, 10

R & D PROGRAM
Assessment of technology for local development, 17

SCIENCE, EDUCATION, AND TRANSPORTATION PROGRAM (SET)
Formerly *Science, Transportation, and Innovation Program (STI)* and *Transportation Program (T)*
Airport and air traffic control system, 20
Airport systems development, 19
Civilian space policy and applications, 18
Civilian space stations and the U.S. future in space, 18

Delivering the goods: public works technologies, management, and financing, 19
Demographic trends and the scientific and engineering work force, 8
Educating scientists and engineers: grade school to grad school, 7
Elementary and secondary education for science and engineering, 7
Federally funded research: decisions for a decade, 17
Gearing up for safety: motor carrier safety in a competitive environment, 19
Global models, world futures, and public policy: a critique, 18
Higher education for science and engineering, 7
Impact of advanced air transport technology:
Part I—advanced high-speed aircraft, 20
Part II—the air cargo system, 20
Part III—air service to small communities, 20
Part IV—financing and program alternatives for advanced high-speed aircraft, 20
Impact of advanced group rapid transit technology, 20
Linking for learning: a new course for education, 7
Moving ahead: 1991 surface transportation legislation, 19
New ways: tiltrotor aircraft and magnetically levitated vehicles, 19
Performance standards for secondary school vocational education, 7
Power on! New tools for teaching and learning, 7
Proceedings of the OTA seminar on the Discrete Address Beacon System (DABS), 20
Rebuilding the foundations: State and local public works financing and management, 19
Regulatory environment for science, 17
Research funding as an investment: can we measure the returns, 17
Review of the FAA 1982 National Airspace System Plan, 19
Safe skies for tomorrow: aviation safety in a competitive environment, 19
Safer skies with TCAS (Traffic Alert and Collision Avoidance System), 19
SALYUT: Soviet steps toward permanent human presence in space, 18
Space science research in the United States, 18
Technology, innovation, and regional economic development, 7
Technology, innovation, and regional economic development: census of State government initiatives for high-technology industrial development, 7
Technology, innovation, and regional economic development: encouraging high-technology development, 7
Transportation of hazardous materials, 20
Transportation of hazardous materials: State and local activities, 20
U.S. passenger rail technologies, 19
U.S.-Soviet cooperation in space, 18
The use of integrity tests for pre-employment screening, 7

TECHNOLOGY AND THE ECONOMIC TRANSITION PROJECT (TET)
Technology and the American economic transition: choices for the future, 7
Review of U.S. competitiveness in agricultural trade, 7
Technology, trade, and the U.S. residential construction industry, 7
Technology and the future of the U.S. construction industry, 7
U.S. textile and apparel industry: a revolution in progress, 7

TELECOMMUNICATION AND COMPUTING TECHNOLOGIES PROGRAM (TCT)
Formerly *Communication and Information Technologies Program (CIT)*
Assessment of alternatives for a national computerized criminal history system, 19
Automated record checks for firearm purchasers, 18
Automation and the workplace: selected labor, education, and training issues, 8
Automation of America's offices, 1985-2000, 4
Big picture: HDTV and high-resolution systems, 5
Computer-based national information systems: technology and public policy issues, 13
Computer software and intellectual property, 5
Computerized manufacturing automation: employment, education, and the workplace, 4
Copyright and home copying: technology challenges the law, 18
Critical connections: communication for the future, 5
Defending secrets, sharing data: new locks and keys for electronic information, 12
Effects of information technology on financial services systems, 13
Electronic bulls and bears: U.S. securities markets and information technology, 12
Electronic delivery of public assistance benefits: technology options and policy issues, 12
Electronic supervisor: new technology, new tensions, 12
Exploratory workshop on the social impacts of robotics: summary and issues, 4
Federal Government information technology:
Electronic record systems and individual privacy, 12
Electronic surveillance and civil liberties, 12
Management, security, and congressional oversight, 12
Social Security Administration and information technology, 12
Helping America compete: the role of Federal scientific and technical information, 12
High performance computing and networking for science, 5
Hospital information systems at the Veterans Administration, 12
Implications of electronic mail and message systems for the U.S. Postal Service, 13
Information technology R & D: critical trends and issues, 13
Informational technology and its impact on American education, 13
Informing the Nation: Federal information dissemination in an electronic age, 12
Intellectual property rights in an age of electronics and information, 19
Microelectronics research and development, 5
Patent-term extension and the pharmaceutical industry, 5
Radiofrequency use and management: impacts from the World Administrative Radio Conference of 1979, 5
Rural America at the crossroads: networking for the future, 5
Science, technology, and the Constitution in the information age:
Biology, medicine, and the Bill of Rights, 17
Criminal justice, new technologies, and the Constitution, 17
Science, technology, and the Constitution, 17
Science, technology, and the First Amendment, 17
Seeking solutions: high-performance computing for science, 5
Selected electronic funds transfer issues: privacy, security, and equity, 13
Supercomputers: government plans and policies, 5
Trading around the clock: global securities markets and information technology, 12

It's a fact.

Free information from the Federal Government is available to you at more than 1,380 Depository Libraries across the country. Congress established the Depository Library Program in 1814 to provide free access to Government information.

To find the Federal Depository in your area, contact your local library or write to the Federal Depository Library Program, Office of the Public Printer, Washington, DC 20401.
